Internship

Dynamic Player Transfer Value Prediction using AI and Multi-source Data | Python, TensorFlow, ML **Feb 2026 - Present**
Infosys Springboard.

- Developed an **AI-based system to predict football players' transfer values** using historical performance data, injury records, and market trends from multiple data sources.
- Implemented **machine learning and LSTM-based time-series models** to capture performance trends and forecast future player market value.
- Performed **data preprocessing, feature engineering, and exploratory data analysis (EDA)** on large football datasets to improve model accuracy.
- Built predictive models using **Python, Pandas, Scikit-Learn, and TensorFlow**, and evaluated them using metrics such as MAE and RMSE.

Projects

Customer Churn Prediction & Retention Analytics System | *Python, Scikit-Learn, Pandas, Machine Learning* **Feb 2026 – Mar 2026**

- Developed a **machine learning–based predictive** system to identify customers likely to churn using historical customer behavior and transaction data.
- Performed **data preprocessing**, **feature engineering,** and **exploratory data analysis (EDA)** to uncover patterns influencing customer retention.
- Implemented classification algorithms such as **Logistic Regression**, **Random Forest**, and **Decision Trees** to predict churn probability and evaluated model performance using **accuracy, precision, recall,** and **F1-score**.
- Repository Link: **GitHub**

Predictive Analysis of Medicine and Doctor Availability | *Python, Machine Learning, Data Analysis* **Nov 2025 - Dec 2025**

- Developed a **predictive healthcare analytics system** to analyze medicine availability and doctor accessibility using healthcare datasets.
- Performed **data preprocessing, feature engineering, and exploratory data analysis (EDA)** to extract meaningful insights from medical data.
- Implemented **machine learning models** to predict medicine demand and assist in identifying doctor availability for improved healthcare decision-making.
- Utilized **Python libraries such as Pandas, NumPy,** and **Scikit-Learn** to process and analyze large healthcare datasets.
- Repository Link: **GitHub**

Certificates / Certifications

Fundamentals of Agents **Feb 2026**
*Hugging Face— **Certificate Link***

Python 101 for Data Science **Mar 2025**
*IBM — **Certificate Link***

Skills

Languages C++, Java, JavaScript, C, Python

Technologies/Frameworks: Git, GitHub, Ubuntu, TensorFlow, Jupyter Notebook, Scikit-learn

Domain Skills: Problem-Solving, Responsive Web Design, Scripting in Python and JavaScript, Operating System,

Education

Lovely Professional University **Aug 2023 – Present**
Bachelor of Technology - Computer Science and Engineering — CGPA: 6.22 *Phagwara, Punjab*

Dronacharya Senoir Secondary School **2022 – 2023**
12th — Percentage: 84.4% *Jhajjar Haryana*

Dronacharya Senior Secondary School **2020 – 2021**
10th — Percentage: 81% *Jhajjar, Haryana*
